

An Introduction to Using Universal Reader Plus with Text from the Internet

Universal Reader Plus can read to you. Make sure you have headphones.

1. Launch Premier Tools
2. You should now see the floating toolbar on your screen.

3. Choose Universal Reader Plus
4. This window will open. It is the Universal Reader Plus Window.

5. You also need to have the Internet open to the article or information that you want Universal Reader Plus to read to you.
6. Highlight the text from the Internet and press CTRL + F6. The text should appear in the blank window and Universal Reader Plus should start automatically.

Troubleshooting: Sometimes it seems like you have closed Universal Reader Plus and the window will not reopen. It is really hiding. Look on the Taskbar, bottom right corner, near the digital time. That is where it is hiding. Right Click on the icon and choose "display reader" to re-open it up.

.Tip: Check the voices ahead of time to ensure that the speed and pitch are appropriate for you to understand the article.
