

St. Clair Catholic  
District School Board

December 7, 2022

Dear Parents/Guardians and Staff,

I want to make you aware of work, which is scheduled to be completed at UCC beginning after 6:00 p.m. on Friday, December 9, 2022. The work is needed to repair a leaking pipe in the ceiling of the girls' change room next to the cafeteria, and the adjacent maintenance office.

The pipe insulation contains asbestos. As is the case whenever asbestos is identified, the asbestos removal work will be completed by *Canadian Industrial Specialties (CIS) Limited*, in compliance with all standards and legislated requirements for asbestos abatement. The job will be supervised and monitored by *OH Solutions*, a company with expertise in the field of environmental health and safety.

Air handling units will be shut off for the duration of the asbestos abatement work and air flow testing will be completed by *OH Solutions*.

A licensed plumber will be on site to repair the leak and the dry wall ceiling will be replaced by a local construction contractor. All work will be completed by the end of the day, Saturday, December 10<sup>th</sup>.

As always, the health and safety of our students and staff is our first priority.

Sincerely,  
Lisa Harnarine  
Principal
