Question and Answer Session

Question: Is it possible for the ARC to get a cost matrix to compare the breakdown from one school to two retrofitted schools?

Answer: At this level, the costing of the options is not possible; these are things that would be required at the Board level when they will be making their final decision. It would be possible for the board staff to produce this matrix but they do not want to be seen to be leading the ARC committee into making a decision. The ARC was reminded that their mandate is to decide what is in the best interest of the students and the Board is required to look at the financial matters.
